

Bill of Materials (BoM) - Cost per year

Web components required for MyVivarium

Note: Many cloud-hosting services provide significant start-up discounts (free for a certain period of time) which can help users determine if the services are amenable to their budget and need. Users can shop around to determine what best suits their budget. By listing the specific vendors here, we do not imply any specific endorsement.

Component	Source	Monthly cost (in USD)	Annual Cost (in USD)	Weblink
Cloud server (1GB RAM, 25GB SSD, 1 TB Transfer, 1 Core Processor)	Digital Ocean	\$6.00	\$72.00	https://www.digitalocean.com/pricing/droplet

Many domain name registrars are available to users at varying levels of cost depending on the market value of the domain name. For example domains ending with **.com** usually are on the expensive end. Less commonly used domains such as **.work** would fall on the lower end of the cost spectrum. We have used namecheap (<https://www.namecheap.com/>) and Cloudflare (<https://developers.cloudflare.com/registrar/>) to purchase domain names.
